

On-line Elementary Resources

February 2014

We are excited to let you know of the on-line resources for our math series, Go Math!, that you can use to support your child in mathematics.

The first resource is called Think Central, which is the on-line resource developed by the publisher of our reading series, Journeys and Storytown, as well as Go Math! Every student in the Omaha Public Schools has a Think Central account. Your child's teacher can assign various practice activities, including lesson tutorials called "Animated Math Models" and games. You and your child use the same account to login to Think Central from any computer with Internet access. The website address is: <https://www-k6.thinkcentral.com/ePC/login.do>

Ask your child about his or her Think Central account or contact your child's teacher for the username and password for your child.

A second resource we are excited to share with you is Go Math! Academy. You can access Go Math! Academy from any computer with Internet access at this website: <https://www.hmhco.com/GoMathAcademy>

The Go Math! Academy offers engaging videos on the math concepts and strategies that you'll see in your child's Go Math! Textbook. You can search the site by grade level and math topics, which closely follow the lessons in your child's textbook.
